Ok. I did hear that from you, but looking at the Governor letter the schedule indicated we would be talking about a sitewide schedule not just OU8. I think the most important pieces at the site are groundwater and Wabuska Drain because have the potential for exposure and we need to show we are dedicated to progress on those, not just if we have time. OU8 is a small part of the site and shouldn't get all the air time.

I think it will help for me to finish that e-mail to you then we can discuss.

I understand on the CIP. Let me know what would work for you next week.

Greg

Thanks for getting back to me. As we discussed, the meeting purpose is to provide an update to the community on what we are hoping to accomplish in the next 10-12 months: 1) primarily move forward to select OU8 remedy so we can have a draft ROD early 2017 and be able to take the project in front of the priority panel to request funding. 2) and give them a heads up/description of the NPL process. If time allows it, a general update on other OUs. I expect that EPA and NDEP will continue to coordinate in the development of the actual presentation, messages and delivery. I am not sure what else NDEP needs to be "absolutely" clear. As you know, it takes some advance work to workout the logistics for a public meeting...contract support, mailing announcements, prep in general. Therefore, we need to commit to a date at least 6 weeks before an even. I thought we had agreed to move forward with the meeting. Please go head and check your calendars and let us know if the June 7 date doesn't work.

In my vmail, I also mentioned updating the CIP. I will send you a meeting invitation for next week so we can discuss further. The info you will be sending will probably informed the need/timing/lead of that effort.

Thanks.

Angeles

Angeles,

I got your v-mail. I can say that NDEP can support having a public meeting on June 7 if we are all absolutely clear on agenda. I know we talked about it but I am not sure what it is yet.

I need to verify staff availability and will get back to you hopefully today.

I will send that sitewide and OU8 planning e-mail we have been talking about to you later today.

Once we set the date I can coordinate with locals as you requested.

Greg
